But can any of these things be said of S. P. Townsens's

The ver he would feel have it malestrood that Oct Pr. Ja-20h Tarmenot's tienaine Original Surangorilla, is an IM-ITATION of his interior proparation?!

Heaven forbid this we should deal it an acticle which would hear the most distant resemblance to S. P. Town-sen'ts article?

We with it understoo!, because it is the absolute truth, that S. P. Town-sen't arricle and old Dr. Jacob Town-sen't Surequerilla are hearen with gonet, and injunite advances that that they are untille in every particular, having not one surely thing to company.

As S. P. Townsend is no doctor, and power was, it is shemist, no pharmaceunic to know no more of meletial or disease than any other common, unscientific, improfessional man, what quaronice can the public have that they are receiving a remains straintific medicine, containing all the virtues of the articles used in preparing it, and which are trapplie of changes which might reader them the AGENTS of Disease instead of health?

But what class should be expected from one who knows nothing comparatively of medicine or disease? It requires a person of some experience to cook and serve upower a common decent meat. How much more important is that the persons who manuscence medicine designed for WEAK STOMACHS AND EXPERBILED SYSTHES, should know well the medical properties is plants, the best should know well the medical properties or plants, the best manner of security and concentrating their busing virus-aiso an extensive knowledge of the various diseases which affect the human system, and how to adapt remedies to these diseases?
